FOR IMMEDIATE RELEASE
May 14, 2014

NEW VALVE RETROFIT LINKAGE OFFERS EASY INSTALLATION WITH NO DOWNTIME.

Danbury, CT, May 14, 2014– Belimo Americas is pleased to announce the release of a larger universal retrofit linkage solution offering quick and easy installation without interruption in service. The new Flanged Globe Valve Linkage (FGVL) will allow users to retrofit their existing 2.5” to 6” globe valves and restore their systems quickly. The retrofit linkages utilizes the EV, RV and AVK series actuators with forces (up to 1011 lbf) which provides the close offs needed for large globe valves. The linkage boasts a rugged steel and aluminum clamp design with selectable fail-safe position switch on the actuators making installation easy. The FGVL retrofit linkage can adjust to fit most flanged globe valves regardless of make and model increasing its flexibility with reduced inventory.

“With the success of FGVL’s little brother the UGVL (Universal Globe Valve Linkage) which fits a broad range of ½” to 2” globe valves this seemed to be the next logical step, says Joseph Carcare Product Manager of Belimo’s Retrofit Solutions. This will pave the way to let people Retrofit globe valves ranging from ½” to 6” with just two linkages choices.”

###

Belimo Americas, a world leader in the design and manufacture of damper actuators and control valves used in commercial HVAC systems. Known for its direct-coupled actuator and innovations in pressure independent control valve technology, Belimo has solutions to maintain an efficient building environment. For over 30 years, Belimo has provided innovations in Comfort, Energy Efficiency and Safety Solutions to customers throughout the United States, Canada and Latin America, all of which are backed by Belimo’s unsurpassed 5-year warranty. For more information, contact Belimo at 1-800-543-9038 or visit the website at www.belimo.com or www.piccv.com.
